Chad E. Branon, Principal of Fieldstone Land Consultants, PLLC is pleased to have worked with Barker Architects on a number of school projects in the Monadnock Regional School District.

These projects ranged from large additions and expansion projects to small security additions with parking, access and utility improvements. Our services included securing all necessary local, state and federal permits. Fieldstone is also assisting with Construction Admin.

As, Project Manager, Mr. Branon navigated and expedited this project successfully through all required permitting to meet project deadlines.
